Others Services:

Inspection

We offer comprehensive third party assessment, inspection and quality assurance services including Factory Audits, OEM Development, Raw Material Inspection, Initial Production Check, In-Production Check, Random Inspection and Loading Supervision. Our third party assessments are impartial therefore provide credible basis for verification for diverse organizations.

Safety Audits

Safety incidents can be harmful to organization productivity and reputation, so it is always worth taking steps to minimize the risk of accidents. Our experienced auditors are performing in-depth safety audit of equipment and workplace and help organizations to Highlight Potential Problems, Increase Employee Awareness, Comply with Relevant Laws and will save money.

Energy Audit

An energy audit can result in financial and environments benefits for a business, it is the key to a systematic approach for decision-making in the area of energy management. Our experience auditors will analyse the plant energy usage, identify all the energy streams in the facility and quantifies energy usage according to its functions. Energy audit report will help organizations to understand more about the ways energy and fuel are used in their industry, and help to identify areas where waste can occur and where scope for improvement exists.
